Rules of clean code (HTML)

Clean code (toza kod) - iloji boricha qisqa, o'qish, tahrirlash va kengaytirish uchun qulay kod.

HTMLda "toza kod" yozish qoidalari:

1. Hamma teglarni kichik harflar bilan yozing;

2. Indentation (satr boshidagi probellar soni)dan to'g'ri foydalaning;

3. Inline stylelar ishlatmang;

4. Rasm uchun `alt` atributini unutmang;

5. Har bir sahifada bittadan ortiq `h1` ishlatmang;

6. HTML Validatorlardan foydalaning;

7. Semantic teglardan foydalaning.

Markup Validation Service

W3C's easy-to-use markup validation service, based on SGML and XML parsers.
