# 41. Breakpoints

Reja:

▼ **Breakpoints**

> 💡 **Breakpoints -** qurilmamizning kengligiga qarab veb sahifamiz o'z kontenti o'zgartiruvchi nuqtalar. Bu nuqtalarda, veb sahifamiz odatda boshqa ko'rinishga o'tib, qurilmaga moslashadi. Ular yana **media query breakpoints** deb ham ataladi chunki ular **media queries** bilan birga ishlatiladi.

Responsive Design Breakpoint

```
<style>
  h1 {
    font-size: 0.8rem;
  }

  /* Kichik devayslar (mobil telefonlar (landscape), 576pxdan yuqorisi) */
  @media only screen and (min-width: 576px) {
```

```
    h1 {
      font-size: 1rem;
    }
  }

  /* O'rta devayslar (planshetlar, 768pxdan yuqorisi) */
  @media only screen and (min-width: 768px) {
    h1 {
      font-size: 1.5rem;
    }
  }

  /* Katta devayslar (noutbuklar, 992pxdan yuqorisi) */
  @media only screen and (min-width: 992px) {
    h1 {
      font-size: 2rem;
    }
  }

  /* Kattaroq devayslar (katta o'lchamga ega monitorlar, 1200pxdan yuqorisi) */
  @media only screen and (min-width: 1200px) {
    h1 {
      font-size: 3rem;
    }
  }
</style>

--------------------

<h1>
  Ekran o'lchoviga qarab o'z o'lchamini o'zgartiruvchi sarlavha
</h1>
```

▼ Amaliyotda ko'p ishlatiladigan breakpoints

mydevice.io : web devices capabilities

Mobile devices, in Responsive Web Design, relate to a core value which is the value of CSS width or ("device-width"), in CSS Device Independant Pixels, which depends both of
